

APMG INTERNATIONAL PROJECT PLANNING AND CONTROL™ FOUNDATION & PRACTITIONER

THE APM'S FIRST COMPREHENSIVE SET OF GUIDANCE AND BEST PRACTICE FOR PROJECT PLANNING AND CONTROL. APPLICABLE ACROSS ALL INDUSTRIES AND SECTORS.

WHAT IS THE PROJECT PLANNING & CONTROL QUALIFICATION?

This qualification scheme supports the publication of the Association for Project Management (APM) guide, 'Planning, Scheduling, Monitoring and Control – The Practical Project Management of Time, Cost and Risk.' Its intention is to provide greater certainty over project delivery.

THIS COURSE WILL:

- ✓ Give a step by step controls guide from project initiation, execution, handover and closeout.
- ✓ Enable effective capability growth for delivery organisations.
- ✓ Provide a holistic overview of the interdependencies between planning and controls functions.
- ✓ Be a practical and scalable companion to almost any project controls professional.

WHAT ARE THE BENEFITS OF THE PROJECT PLANNING & CONTROL QUALIFICATION?

For the individual

The guide is written in plain English - so even if this is your first experience in the field of planning and controls you should feel comfortable understanding and working towards success. Learners will gain an understanding of minimum standards and best practice, and enjoy guidance on how to comply with Works Information requirements laid out in contracts. In addition, students will learn lessons from a wide base of delivery organisations and benefit from a broad perspective of experienced controls practitioners.

For the organisation

Equally implementation of PPC within an organisation delivers improved technical competence of team members, improved quality of schedules leading to more certainty in project delivery, greater predictability of project forecasting and success, and higher levels of integration between controls functions i.e. cost and time.
