Change Management CERTIFICATION

Change is inevitable. Dealing with change and, more importantly, the impact of change is a high priority for all organizations. This course will give you the guidance you need for the effective management of the impact of change.

What is the Change Management Certification?

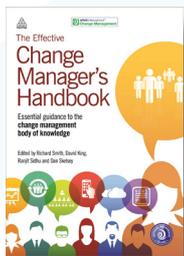

Change Management is a vital and high-profile remit within any business. In order for it to be effective, Change Management needs to be conducted in a strategic, timely and measurable way. This does not happen by chance.

If you deal with Change Management, you will need the right skills, experience, support and tools to effect real and long-lasting change. In these unprecedented times of uncertainty and risk within businesses of all sizes, Change Management is more important than ever.

The APM Group International's Change Management certifications will equip you to manage digital transformation, risk management and people leadership - all critical pillars of Change Management. For business leaders looking to upskill their staff on the principles and practical aspects of this discipline, the certification will give you peace of mind that any organisational change will be managed effectively.

We offer two options for the Change Management certification. For those new to the role, the Foundation course is an introduction to the principles and practices associated with this area of business. The combined Foundation and Practitioner course is recommended for anyone who wants to develop a thorough understanding and practical experience of Change Management.

At the end of the course, candidates will be required to complete an exam. The format of the exam differs based on the levels undertaken, with the Foundation course exam being multiple choice and the combined course including objective questions.

The Effective Change Manager's Handbook

The Effective Change Manager's Handbook is a powerful learning resource in supporting and developing highly effective change managers - the perfect addition to the Change Management certification.

We would recommend 'The Effective Change Manager's Handbook' to complement your studies

What are the benefits of the Change Management Certification?

- ✓ Build the organization's and individual's capability and capacity to deal successfully with change, improving agility.
- ✓ Increase the probability of successful business change/transformation – supporting strategic direction.
- ✓ Minimise the risks (costs, delays, loss of employee engagement, reputation) associated with failed initiatives.
- ✓ Build and maintain the engagement of internal and external stakeholders with new initiatives.
- ✓ Manage more effective change communications so that change is understood and supported.
