Study online

- Study at your own pace on our dedicated Learning Platform
- Access the course and exam anywhere, anytime
- Engaging and expert content

You can study our course online at your own pace from anywhere in the world via our dedicated Learning Platform.

Designed by skilled animators and the most knowledgeable script writers, our online courses are incredibly engaging and use a mix of audio, film, animation, pictures and diagrams; this ensures they are suitable for all types of learners.

Quality online learning is at the heart of what we do, so when you study a Training ByteSize course you can be assured of a tried and tested quality product.

Study in a virtual classroom

- Teaching in the comfort of your home or office
- Ask questions to our trainers throughout the training using a webcam or headset
- Expert trainers
- Access training and take your exam anytime, anywhere

Our Virtual Course platform delivers accredited and certified training, led by leading subject matter experts, direct to your home, mobile, computer or office without the hassle of travelling or staying away. It is so easy to fit in an online class into your busy schedule; simply log in from home, the office, or even while you are travelling.

Students can ask questions using a headset, webcam, or a chat window, and have their questions answered, just like in a traditional classroom. Questions can be lined up and answered at intervals without interrupting the teacher's flow of thought. There is no difference in the level of interaction – in fact, distractions are significantly reduced because of this way of teaching.

If you have a group to train, we have a structured programme in place to ensure everyone gets the most out of the course. We offer a managed service where we can provide regular reports on learners' progress and share quiz results to ensure only those that are ready are put forward for the exam.

Excellent online course, the exams were easily attended and the results received back promptly. I would recommend to another service leaver.
